DETAILED ACTION

This Office action responds to application ser. no. 10/072,658 filed on 2/7/2002.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a semiconductor device, classified in class 257, subclass 288.
- II. Claims 12-18, drawn to a method of making a semiconductor device, classified in class 438, subclass 197.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product made and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

In the instant case unpatentability of the group-I invention would not necessarily imply unpatentability of the group-II invention, since the process steps of the group-II invention could be used to make other and materially different products than those of

Art Unit: 2814

the group-I invention. For example, the step of forming an inter-dielectric layer, recited in claim 12, could be used to form a semiconductor device in which the lowermost layer of the inter-dielectric layer is a nitride film instead of the oxide film recited in claim 8.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

6. Papers related to this application may be submitted directly to Art Unit 2814 by facsimile transmission.
